

SEE-BLITZ

Project: **SEE-BLITZ ..**

Item: **SB – FLMT2 FLANGE MOUNT**

Category: SAR Variant

Background:

The "FLANGE MOUNT SEE - BLITZ" was developed as a response

to ESSO Offshore's requirement for an external strobe on their Brucker Escape Capsules.

The contracted Helicopter Rescue Service wanted an effective visual location and requested a SEE - BLITZ based system. They already operate with the SEE - BLITZ as standard equipment. (SEE-BLITZ™ is the official light marker used by AUSSAR)

Description:

The system comprises of a re-designed flange mount for the Light Wand; 75 mm overall height was specified as maximum with the Electronics housed separately inside the capsule. A further requirement was for operation with onboard power, so an universal power adapter was built in to the casing to accommodate a wide range of voltages.

The success of the SB-FLMT and the need for a stand-alone permanently mounted SEE-BLITZ™ led to the development of the SB-FLMT 2.

This latest version of the Flange Mount SEE-BLITZ 2™ has the Strobe Electronics integrated into the base and allows the unit to be directly connected to onboard power. (6 – 24 V DC)

Dimensions: 85.0mm Dia. 90.0mm High Countersunk Mounting Holes (4 at 90°) M4 Allen Screws

Material: Acetal; Polycarbonate; 316 Stainless Steel; Arctic Grade Cable

Environment: Marine IP68
